

Paranormal Romance, M/F/M, Wolf Shifters, HEA~Shelly Brooks-Lancaster has been forbidden to have mates. She has been told often that she is not worthy, not pretty, and not good enough to be part of a mating. The Fates step in and show her that she is not only all of those things, she is needed by the men who are meant to be hers. Her sweet wolves give Shelly the courage to reject her mothers decree.~Maxwell Oliver and Eli Granger work as enforcers for Alpha Randall. They have known pain and suffering - often taking the cruel and unjust punishments for pack members. They long for a woman to complete their triad, but they know better than to hope any woman would think them worthy mates. Then they met Shelly. She is goodness and light in their dark world.~Life pulls them apart, but their hearts know what they need. They must hold tightly to each other. A life of love, happiness, and children await them.~Note: It is suggested that the previous titles in the series be read first for continuity.
